Abad: 60% of city meat isn't safe for consumption  
Estimated that about 60 per cent of the meat  
consumption of city is being met through illegal slaughter.  
The government has issued a mandate that only healthy sheep and goats  
certified by veterinary doctors can be slaughtered for  
consumption. However, this is not happening as butchers are  
slaughtering animals near the slaughterhouses located  
within the city which were closed down four years  
back.

Though the High Court gave permission to reopen them, it insisted that they should be  
modernised. But this has not been done and there are still no GHMC veterinary doctors at  
these places. Veterinary doctors are available only at the modern abattoir at  
Chengicherla and not many butchers prefer to go there as it is located 30-km away.  
Because of this, illegal slaughter of animals is on the rise.
